

AMKCO Bag Dumping Station with integral vibratory screener. Maintains quality, contains dust !

The AMKCO Bag Dumping Station employs an integrally mounted vibratory screener to remove lumps, oversize particles, paper bag pieces, string, and other foreign objects from materials dumped manually from bags, drums, boxes and other containers. Available in 750 mm, 1000 mm or 1200 mm dias, the AMKCO Bag Dumping Station can be specified with either conventional side discharge or low profile "Straight Flo" screeners and supplied with options including integral bar magnets, self-contained dust collection systems & loading hopper doors. Various outlets including BFM fittings are available for connection to any conveyor or downstream process equipment.

"Straight Flo" Low Profile Bag Dumping Station
