

AMKCO *Straight Flo Low Profile Screener* *High Capacity in a Low Profile design*

The AMKCO Straight Flo Low Profile Screener offers high capacity wet or dry trash screening / scalping in a low profile and compact design. Twin vibrator motors mounted externally 180 degrees apart allow required headroom to be reduced considerably making for easy in line installation in existing process lines. The innovative "Straight Flo" design allows the bottom outlet to be located directly beneath the top inlet enabling screened material to pass straight through the machine at very high rates. The AMKCO Straight Flo Low Profile Screener is ideally suited to many trash & safety screening applications in the mineral process ,chemical, food & pharmaceutical industries

AMKCO Straight Flo Low Profile Screeners are available from 450 mm to 2150 mm in diameter complete with standard accessories including Dust Covers , Ball Trays , Self Cleaning Ring Kits , Discharge Magnets and Quick Screen Change Kit. Can be constructed to 3A and other standards for sanitary applications.
